

QuickFrame

Do more with video.

QuickFrame is changing the way organizations use video to communicate. Our intelligent video platform reduces the time, cost, and subjectivity of traditional video creation, enabling you to do more with video.

Our Platform

CREATE

Don't have a rolodex of experienced video creators? Don't worry—we do. Our **Marketplace** has thousands of vetted creators and production companies that can produce any style of video you need for every platform and any audience.

LEARN

Today, video creative is guided by intuition rather than insight. **Video Intelligence**, our AI-powered analytics tool, reveals exactly what elements are driving performance for you and your competitors so you can act accordingly.

SCALE

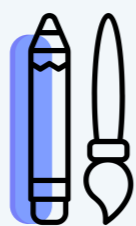

Rounds of creative revisions increase budgets and extend production timelines. Our revolutionary **briefing technology** lets you sprint as you scale by clearly outlining project goals from the very beginning—get exactly what you envisioned the first time.

Our Marketplace of creators do it all.

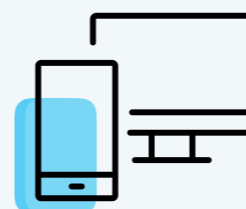

From explainer videos and product announcements, to platform-specific video ads and geographically relevant content, our vast Marketplace contains the perfect creator for getting the job done.
